D7: Initial Content Engineering (type Data)

Responsible author: Vlado Stankovski (FGGI)

Co-authors: Mateja Šmid, Žiga Turk, Etiel Petrinja (all LJU)

Access: public

Version: 1.02

Date: Feb 27, 2004

SUMMARY:

Deliverable D7 results from the task "2.04 Provide initial content in engineering: available content sources, established above, will be examined; content will be included into the repository". It is a "data" deliverable defined as "Initial content from the field of engineering and construction is compiled - at least 1000 papers of that 500 in full text". The deliverable was planned to be released in two versions.

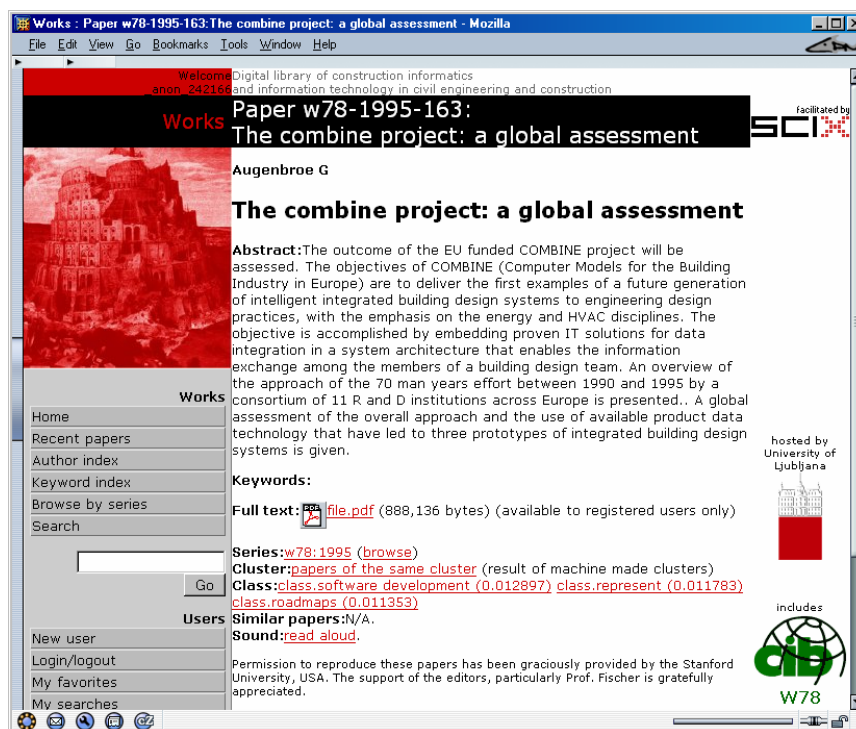

This document provides documentary evidence that this data has been compiled. It is being used in further SciX investigations and prototyping. It results from collecting content according the identified content sources (see report D05). The figures mentioned are dated with 1.2.2004 and are related to the ITC Digital Library publicly set up at <http://ITC.SciX.net/> and the <http://itc.fgg.uni-lj.si/egseaai/bib.cgi/>

Currently this service lists 1328 papers from these categories:

- ecce (124)
- itcon (42)
- other (11)
- eg-sea-ai (399)
- w78 (748)

802 of those are available in full text format - in PDF. All PDF files are watermarked. The total size of the full text files is 0.5 gigabytes, the total size of the metadata is 1.7 megabytes.

Sample record is shown below:

RELEASE HISTORY

| date | changes |
|----------------|--|
| February 2004 | 1300+ papers, version 1.02 of the report |
| January 2003 | first 600 papers |
| June 2003 | further 120 papers from W78 2003 added |
| September 2003 | further 200 papers added |
| 31.10.2003 | version 1.0 of this document released |
| 13.11.2003 | version 1.01 of this document released; corrected header |
| 31.1.2004 | version 2.0 of this document planned |

The SciX Consortium would like to acknowledge the financial support of the European Commission under the IST programme.
